

TA26

series

Product Segments

• **Comfort Motion**

TiMOTION's TA26 series electric linear actuator is designed for furniture applications such as recliners or lift chairs. This linear actuator is designed to function as a direct cut system, eliminating the need for a control box, offering a straightforward and cost effective alternative to complex electric actuation systems.

General Features

Max. load	4,000N (push), 2,000N (pull)
Max. speed at max. load	6.1mm/s
Max. speed at no load	24mm/s
Retracted length	≥ Stroke + 120mm
Certificate	UL962
Options	Hall sensor(s)
Voltage	12/24V DC; 24V DC (PTC)
Color	Black
Operational temperature range	+5°C~+45°C

Load and Speed

CODE	Load (N)		Self Locking Force (N)		Typical Current (A)		Typical Speed (mm/s)	
	Push	Pull			No Load 32V DC	With Load 24V DC	No Load 32V DC	With Load 24V DC
Motor Speed (3800RPM, duty cycle 10%)								
A	4000	2000	3000	4000	1.0	5.0	12.0	6.1
B	3000	2000	500	2500	1.0	4.5	18.0	7.5
C	2000	2000	350	1500	1.0	4.0	24.0	12.8

Note

- Please refer to the approved drawing for the final authentic value.
- This self-locking force level is reached only when a short circuit is applied on the terminals of the motor. All the TiMOTION control boxes have this feature built-in.
- Operational temperature range: -25°C~+65°C
- The current & speed in table are tested with 24V DC motor. With a 12V DC motor, the current is approximately twice the current measured in 24V DC; speed will be similar for both voltages.
- The current & speed in table are tested when the actuator is extending under push load.
- The current & speed in table and diagram are tested with TiMOTION control boxes, and there will be around 10% tolerance depending on different models of the control box. (Under no load condition, the voltage is around 32V DC. At rated load, the voltage output will be around 24V DC)
- The current & speed in table and diagram are tested with a stable 24V DC power supply.
