

TA6

series

Product Segments

- **Comfort Motion**

TiMOTION's TA6 series linear actuator is designed for lift applications like recliners, lifting chairs and movie theater seating. Its right angle design reduces noise and allows for fitment into most applications. Industry certifications for the TA6 linear actuator include EMC and RoHS. In addition, the TA6 is available with optional Hall sensors for position feedback. It can also be used where freewheeling push only functionality is desired.

General Features

Max. load	6,000N (push); 4,000N (pull)
Max. speed at max. load	5mm/s
Max. speed at no load	39mm/s
Retracted length	≥ Stroke + 163mm
Certificate	UL962, EMC
Stroke	25~1000mm
Options	Freewheeling push only, safety nut, Hall sensors
Voltage	12/24/36V DC
Color	Black
Operational temperature range	+5°C~+45°C

Note

- 1 Please refer to the approved drawing for the final authentic value.
- 2 This self-locking force level is reached only when a short circuit is applied on the terminals of the motor. All the TiMOTION control boxes have this feature built-in.
- 3 Operational temperature range at full performance: +5°C~+45°C
- 4 The current & speed in table are tested with 24V DC motor. With a 12V DC motor, the current is approximately twice the current measured in 24V DC. With a 36V DC motor, the current is approximately two-thirds the current measured in 24V DC. Speed will be similar for all the voltages.
- 5 The current & speed in table are tested when the actuator is extending under push load.
- 6 The current & speed in table and diagram are tested with TiMOTION control boxes, and there will be around 10% tolerance depending on different models of the control box. (Under no load condition, the voltage is around 32V DC. At rated load, the voltage output will be around 24V DC)
- 7 Standard stroke: Min. ≥ 25mm, Max. please refer to below table.
