High Quality, Heavy Duty,
Industrial-Grade Actuators

INDUSTRIAL MOTION

TiMOTION ELECTRONIC LINEAR ACTUATORS – MOTION TECHNOLOGY THAT HELPS PROVIDE A CLEANER, BETTER FUTURE

Many industrial applications require heavy-duty automation on a large scale — especially for agricultural, construction, mining, ventilation, and process control machinery, among others. The technology is out there, and it's only getting better. Equipment manufacturers are increasingly turning to electric linear actuators as a cost-efficient and reliable alternative to previous industry standards, such as hydraulic and pneumatic motion systems. TiMOTION's Industrial Motion product line is shown within this catalog, as well as additional information about what we offer and the full benefits of our linear actuator technology.

Features and Benefits of TiMOTION Actuation Systems for Industrial Applications

- Five year mechanical warranty
- Aluminum and steel construction
- Acme and ball screw drive
- Customization
- Clutch or internal limit switches
- Multiple feedback options
- Easy installation
- Excellent engineering support
- IP69K protection available
- Heavy duty construction
- Low maintenance
- Wide speed range

JP3 series

TiMOTION's JP3 series inline linear actuator was designed for low load industrial applications where up to IP69K dust and liquid ingress protection is necessary. It is best suited for applications with visual or compact installation dimension requirements. Hall sensors are optional for the JP3 which allow for synchronization and position feedback.

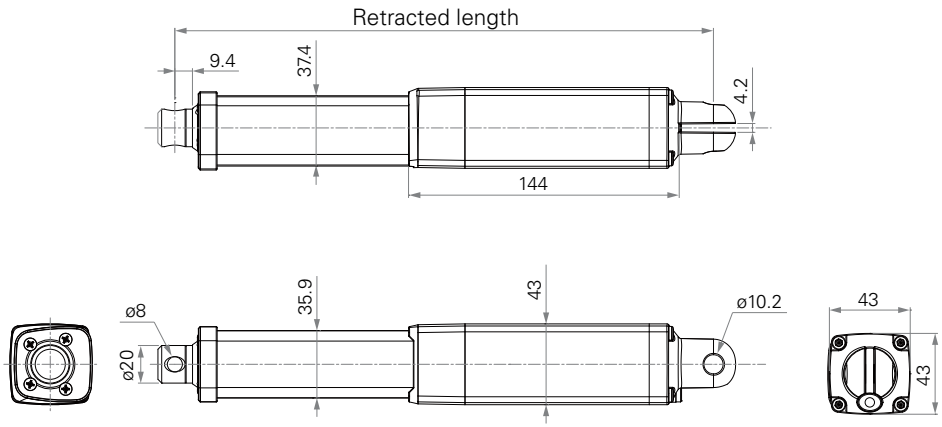
Load and Speed

	CODE	Load (N)		Self Locking Force (N)	Typical Current (A)		Typical Speed (mm/s)	
		Push	Pull		No Load 24V DC	With Load 24V DC	No Load 24V DC	With Load 24V DC
Motor Speed (5600RPM)	B	2000	2000	1000	1.0	3.0	7.0	3.5
	C	1500	1500	500	1.0	3.0	10.0	6.5
	D	1000	1000	300	1.0	3.0	14.5	8.5
	E	500	500	200	1.0	3.0	23.5	19.0

NOTE

1 With a 12V motor, the current is approximately twice the current measured in 24V; speed will be similar for both voltages.
2 This self-locking force level is reached only when a short circuit is applied on the terminals of the motor. All the TiMOTION control boxes have this feature built-in.
3 Please refer to the approved drawing for the final authentic value.

Standard Dimension (mm)



General Features

Maximum load	2,000N in push and pull
Maximum speed at full load	19mm/s (with 500N in a push or pull condition)
Stroke	20~1000mm
Minimum installation dimension	Stroke+217mm
IP rating	Up to IP69K
Color	Black or grey
Certificate	UL73
Operational temperature range	-5°C~+65°C
Operational temperature range at full performance	+5°C~+45°C
Storage temperature range	-40°C~+70°C

An inline actuator designed for small spaces

Performance Data

Motor Speed 5600RPM, Duty Cycle 10%

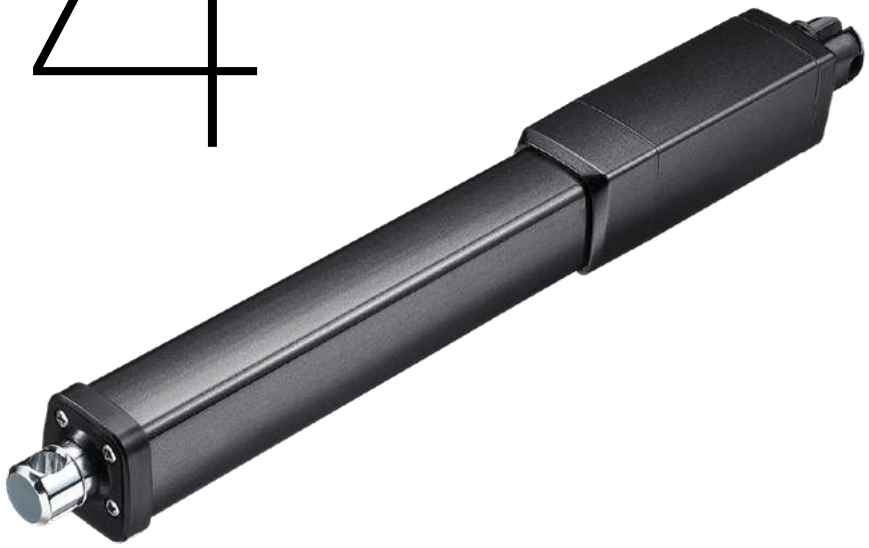
JP4 series



TiMOTION's JP4 series inline linear actuator is most similar to the JP3, but was designed for industrial applications that require higher load and speed. Its IP69K protection ensures it will withstand high temperature, high pressure water jets, and the ingress of dust and other solid contaminants. For synchronization and position feedback, the JP4 can be equipped with Hall sensors.

MA1 series

TiMOTION's MA1 series linear actuator is the proven choice for applications requiring a durable, long life solution. Specifically designed for harsh working environments, the MA1 linear actuator is ideal for use in heavy-duty machinery, industrial equipment and off road vehicles. This linear actuator has been certified for applications requiring IP66 dynamic compliance.Available options for the MA1 linear actuator include AC or DC power, ball or acme spindles, mechanical or electrical braking and a load limiting clutch or limit switches.

MA2 series

TiMOTION's MA2 series linear actuator was specifically designed for applications which face harsh working environments and require ruggedness and durability. Its IP69K protection ensures it will withstand high temperature, high pressure water jets, and the ingress of dust and other solid contaminants. The MA2 also has optional Reed switches along the outer tube which allow users to adjust the stroke length. For improved control and accuracy of motion, the MA2 can be customized with many different feedback options depending on your application requirements. Example applications suitable for the MA2: Agricultural equipment such as spreaders, harvesters, grain handlers, combines and tractors.

Load and Speed

	CODE	Load (N)		Self Locking Force (N)	Typical Current (A)		Typical Speed (mm/s)	
		Push	Pull		No Load 24V DC	With Load 24V DC	No Load 24V DC	With Load 24V DC
Motor Speed (5200RPM)	F	1000	1000	1300	2.7	8.4	52.5	43.0
	G	2000	2000	2600	2.4	7.5	25.5	22.3
	H	4000	4000	5200	2.3	8.0	13.2	11.1
	J	6000	6000	7800	2.0	6.8	6.6	6.1

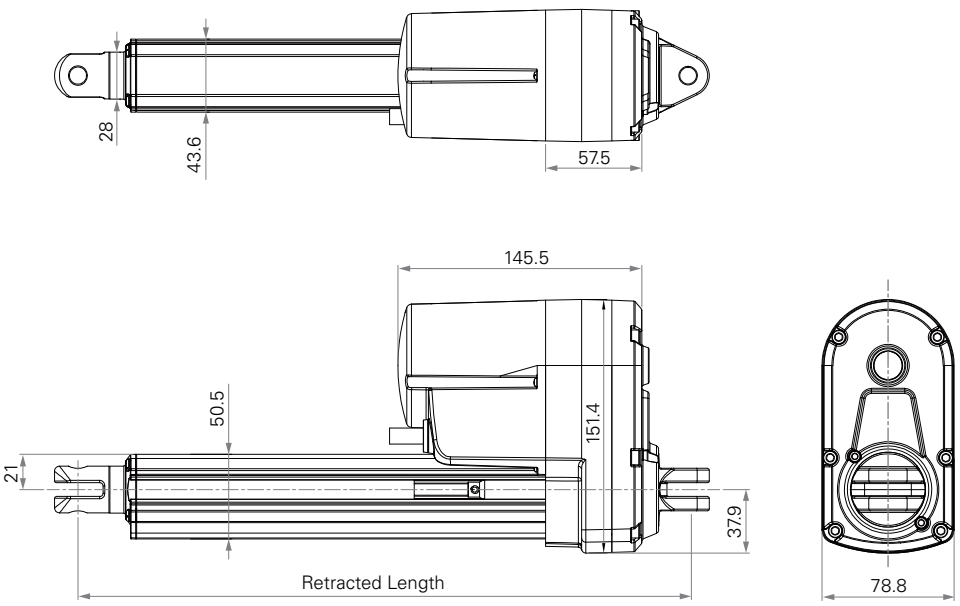
NOTE

1 With a 12V motor, the current is approximately twice the current measured in 24V. With a 36V motor, the current is approximately two-thirds the current measured in 24V; speed will be similar for both voltages.

2 This self-locking force level is reached only when a short circuit is applied on the terminals of the motor. All the TiMotion control boxes have this feature built-in.

3 Please refer to the approved drawing for the final authentic value.

Standard Dimension (mm)



General Features

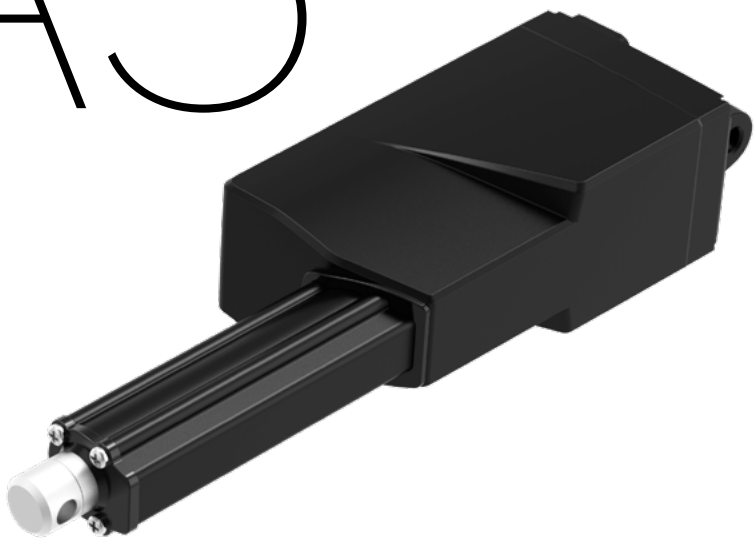
MA5 series



TiMOTION's MA5 series linear actuator was specifically designed for applications which face harsh working environments and require ruggedness and durability. Its IP69K protection ensures it will withstand high temperature, high pressure water jets, and the ingress of dust and other solid contaminants. The MA5 can be customized with many different feedback options depending on your application requirements and can be equipped with grease nipple to increase the protection and life. Example applications suitable for the MA5: Agricultural equipment such as spreaders, harvesters, grain handlers.

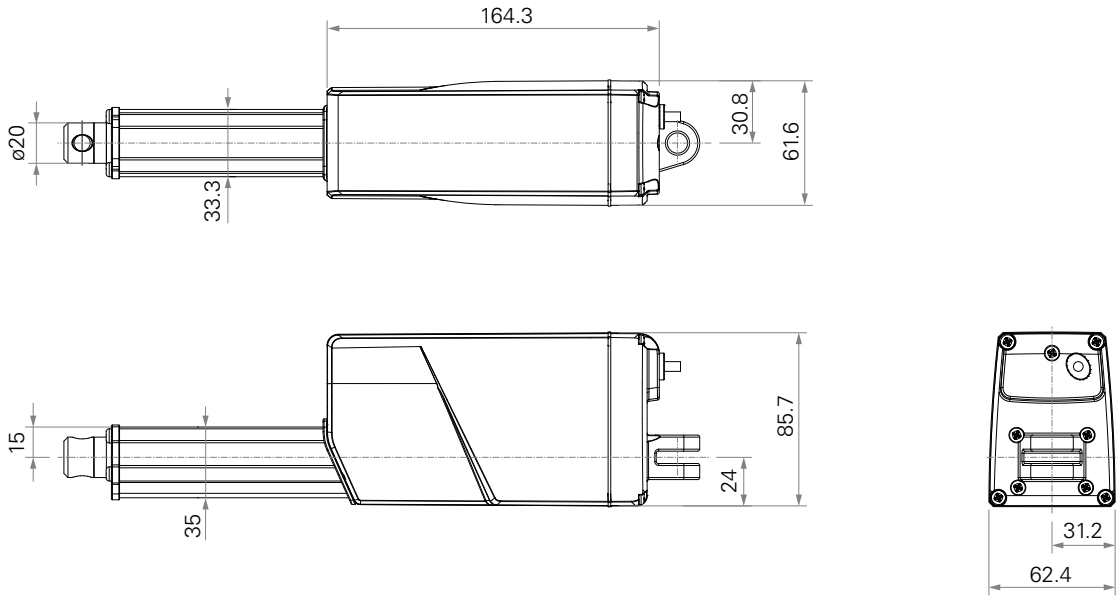
Load and Speed

	CODE	Load (N)		Self Locking Force (N)	Typical Current (A)		Typical Speed (mm/s)	
		Push	Pull		No Load 24V DC	With Load 24V DC	No Load 24V DC	With Load 24V DC
Motor Speed (5200RPM)	A	250	250	250	1.2	2.3	43.0	36.0
	B	500	500	500	1.1	2.3	25.8	23.0
	C	1000	1000	1000	1.1	2.3	14.0	11.8
	D	1500	1500	1500	1.0	2.2	9.0	8.0
	E	2000	2000	2000	1.0	2.2	7.1	6.2
	W	500	500	500	1.3	5.0	54.0	35.0
Motor Speed (6600RPM)	F	250	250	250	1.6	2.8	56.5	45.0
	G	500	500	500	1.5	2.8	32.5	28.5
	H	1000	1000	1000	1.5	2.8	16.5	14.3
	K	1500	1500	1500	1.3	2.8	11.1	10.0
	L	2000	2000	2000	1.3	2.8	8.8	7.7
Motor Speed (3800RPM)	S	3500	2000	3500	0.9	2.8	3.2	2.4
Motor Speed (2200RPM)	T	2000	2000	2000	0.3	1.2	3.2	2.4

NOTE

1 With a 12V motor, the current is approximately twice the current measured in 24V. With a 36V motor, the current is approximately two-thirds the current measured in 24V; speed will be similar for both voltages.
2 This self-locking force level is reached only when a short circuit is applied on the terminals of the motor. All the TiMotion control boxes have this feature built-in.
3 Please refer to the approved drawing for the final authentic value.

Standard Dimension (mm)



General Features

Maximum load	3,500N in push
Maximum load	2,000N in pull
Maximum speed at full load	45mm/s (with 250N in a push or pull condition)
Stroke	20~1000mm
Minimum installation dimension	≥ 238 or 250mm (upon the front attachment)
IP rating	Up to IP69K
Operational temperature range	-25˚C ~ +65˚C
Operational temperature range at full performance	+5°C~+45°C
Options	Hall sensor(s), POT

TA2 series

TiMOTION's TA2 series linear actuator is compact, robust and capable of performing well in certain outdoor environments. This linear actuator is perfect for use in small spaces where force or capability cannot be sacrificed. Options include feedback sensors, signal sending limit switches and 90 degree clevis mounting. Industry certifications for the TA2 linear actuator include UL73, EMC.

Load and Speed

	CODE	Load (N)		Self Locking Force (N)	Typical Current (A)		Typical Speed (mm/s)	
		Push	Pull		No Load 24V DC	With Load 24V DC	No Load 24V DC	With Load 24V DC

TA2P series

Both the TA2 and the TA2P are compact, robust, and capable of performing well in certain outdoor environments. A more powerful motor makes the TA2P capable of handling load ratings up to 3500N (787 pounds) while retaining its compact size. In addition to the high power motor, the TA2P linear actuator is available with multiple choices for feedback sensors.

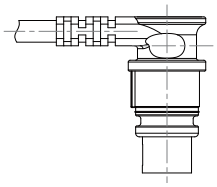
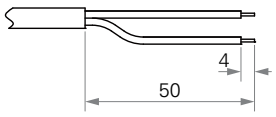
Connector



1 = DIN 6P, 90° plug



2 = Tinned leads

TA16 series

TiMOTION's TA16 series linear actuator is similar to the TA2 linear actuator, but is specifically designed for low-noise industrial applications where a compact linear actuator is needed. It is available with optional IP66 protection and Hall sensors for position feedback.

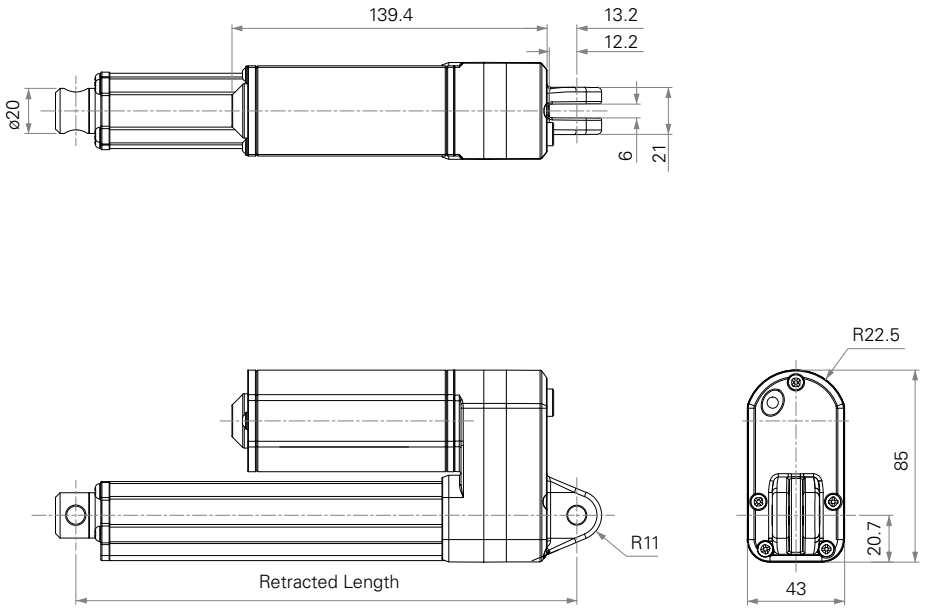
Load and Speed

	CODE	Load (N)		Self Locking Force (N)	Typical Current (A)		Typical Speed (mm/s)	
		Push	Pull		No Load 24V DC	With Load 24V DC	No Load 24V DC	With Load 24V DC
Motor Speed (3800RPM)	A	2500	2500	2500	1.2	2.8	5.2	3.0
	B	2000	2000	2000	1.2	2.8	8.3	4.7
	C	1500	1500	1000	1.2	2.8	11.9	7.0
	D	1000	1000	1000	1.2	2.8	17.7	10.3
Motor Speed (5600RPM)	G	3500	3500	2000	1.5	4.7	12.0	6.5
	J	2000	2000	1000	1.5	3.2	17.0	10.5
	K	1500	1500	700	1.5	3.5	23.5	13.5

NOTE

1 With a 12V motor, the current is approximately twice the current measured in 24V; speed will be similar for both voltages.
2 This self-locking force level is reached only when a short circuit is applied on the terminals of the motor. All the TiMOTION control boxes have this feature built-in.
3 Current and speed: Tested average value when extending in push direction.
4 Please refer to the approved drawing for the final authentic value.

Standard Dimension (mm)



General Features

Maximum load	3,500N in push and pull
Maximum speed at full load	13.5 mm/s (with 1500N in a push or pull condition)
Stroke	20~600mm
Minimum installation dimension	Stroke+112mm
IP rating	Up to IP66
Operational temperature range	+5°C~+45°C
Options	POT, Hall sensor(s)

With very low noise, small size for easy installation

TA21 series

TiMOTION's TA21 electric linear actuator was designed for use in height adjustable industrial workstations. Customers have a high degree of design flexibility with this actuator as it does not include a standard outer tube. This allows manufacturers to decide on the exact aesthetic and ingress specifications for their electric lifting column and overall application

TGM1 series

TiMOTION's TGM1 series gear motor was designed primarily for ergonomic applications like height adjustable workstations and tables, but can be used in many other applications. This economical product allows for fast, smooth and quiet adjustment of built-in spindles through the use of external limit switches. Shafting allows for the mechanical synchronization of dual spindles.

TL3
Ordering Key Appendix

Retracted Length (mm)

1. Minimum retracted length needs to≥ A+B+C

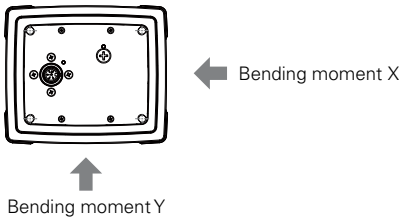
A. Retracted Length (mm)	Load (N)		
	1000	2000	4000
	Stroke/ 2+150 or Stroke/ 2+220*		

*The minimum retracted length generated by the formula-Stroke/2+150 applies to the minimum bending moment rating. Please refer to the left column of the "Dynamic bending moment chart".

B. Cable Exit	Code	Top end socke	Bottom side cable	Side Cable	Direct Cut
	1, 2	-	-	-	-
	3	-	-	+15	-
	B, D, E	-	-	-	+35
	C	-	-	-	-

C. When with POT (When without POT, C=0)	Cable Exit	Top end socket	Bottom side cable	Top side cable
		1	2	3
		+40	+40	+40

Dynamic bending moment (Nm)- X direction	Stroke (mm)	Retracted Length (mm)	
		S/2+150	S/2+220
	100-300	700	1000
	301-500	500	800
	501-700	300	500
	701-1200	200	200



NOTE

1 Bending moment Y direction= X*0.8
2 Static bending moment= dynamic*2

Functions for Limit Switches

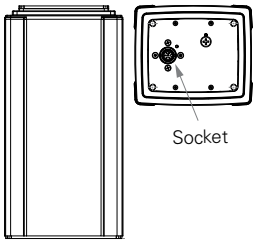
Wire Definitions

		CODE	
	Pin	**1**	**3**
Green	1	Extend (VDC+)	Extend (VDC+)
Red	2	N/A	Common
White	3	N/A	Upper limit switch
Black	4	N/A	N/A
Yellow	5	Retract (VDC+)	Retract (VDC+)
Blue	6	N/A	Lower limit switch

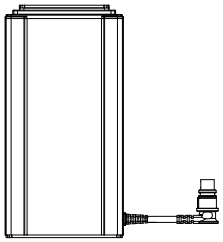
NOTE

1 See ordering key - functions for limit switches.

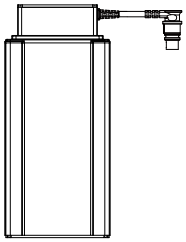
Cable Exit



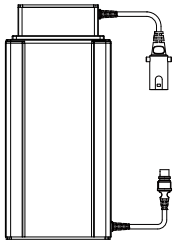
1 = Top end socket



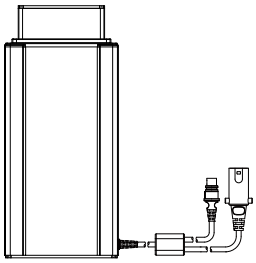
2 = Bottom side cable



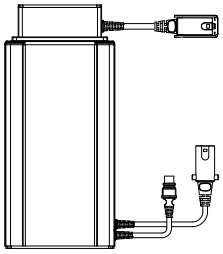
3 = Top side cable



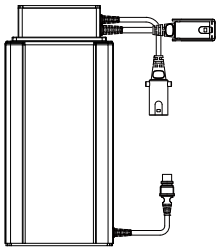
B = Top side- for TH; Bottom side- for TP



C = Bottom side- Y cable, for TH + TP

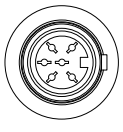


D = Top side- for the 2nd column; Bottom side- for TH & TP

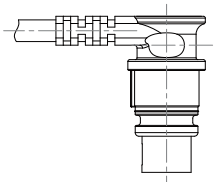


E = Top side- for the 2nd column & TH; Bottom side- for TP

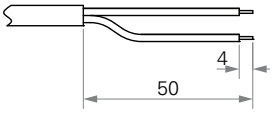
Connector



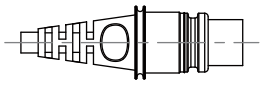
1 = DIN 6P, socket (Top end socket)



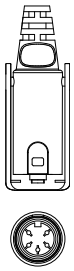
1 = DIN 6P, 90° plug



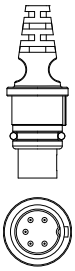
2 = Tinned leads



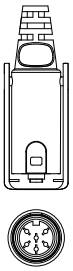
F = DIN 6P, 180° plug



C = Directcut, water proof, anti-pull.
For TH: long DIN 5P
(Pin array 240°),180° socket
(with anti-pull clip)

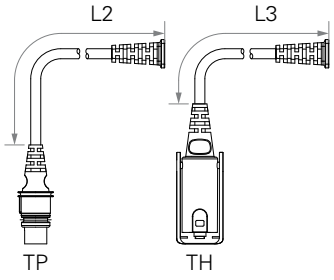


C = Directcut, water proof, anti-pull.
For TP: long DIN 5P
(Pin array 240°),180° plug
(with O-ring)

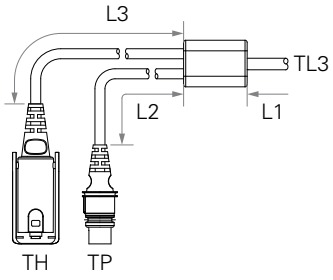


C = Directcut, water proof, anti-pull.
For Columm 2: long DIN 6P
(Pin array 240°),180° socket
(with anti-pull clip)

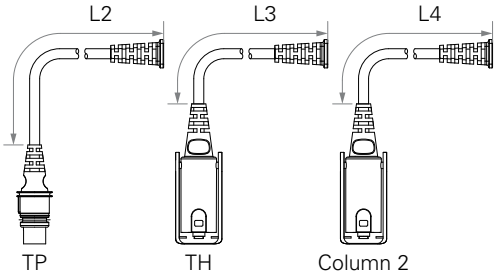
Cable Length
(mm)



B = Cable exit #B, L2 = L3 = 100

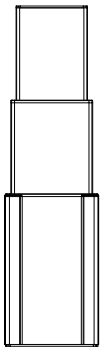


C = Cable exit #C, L1 = L2 = L3 = 100

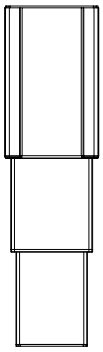


D, E = Cable exit #D, #E, L2 = L3 = L4 = 100

Tubes Direction



0 = Thinner on top



1 = Wider on top

TL18 series

TiMOTION's TL18 series electric lifting columns are designed for industrial applications like electric height adjustable workstations and screen or lifting tables. The TL18 features an extruded aluminum rectangular appearance. Our high capacity, yet economical, TL18 provides stable vertical lifting. This streamlines the engineering design process and replaces the older style, unsafe lifting mechanisms which have many moving stages and pinch points.

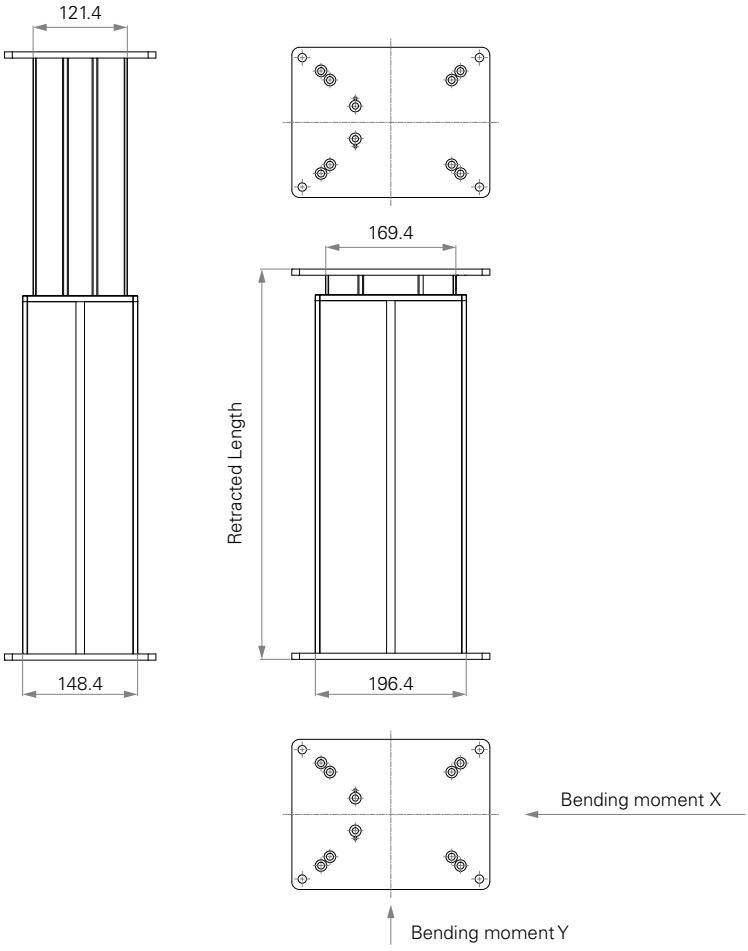
Load and Speed

	CODE	Load (N)	Bending Moment-X Direction (Nm)		Self Locking Force (N)	Typical Current (A)		Typical Speed (mm/s)	
		Push	Dynamic	Static		No Load 24V DC	With Load 24V DC	No Load 24V DC	With Load 24V DC
Motor Speed (3800RPM)	U	4500	250	500	4500	2.5	4.9	11.4	6.6
	Z	3000	250	500	3000	2.5	5.5	17.1	9.5
	W	2000	250	500	2000	2.5	4.8	22.9	13.1
	S	1500	250	500	1500	2.5	4.7	30.0	18.9
	V	500	250	500	500	2.5	4.0	45.0	28.0

NOTE

1 With a 12V motor, the current is approximately twice the current measured in 24V; speed will be similar for both voltages.
2 Self locking force: Tested average value when working with TiMOTION control system.
3 Y direction= X*0.8
3 Please refer to the approved drawing for the final authentic value.

Standard Dimension (mm)



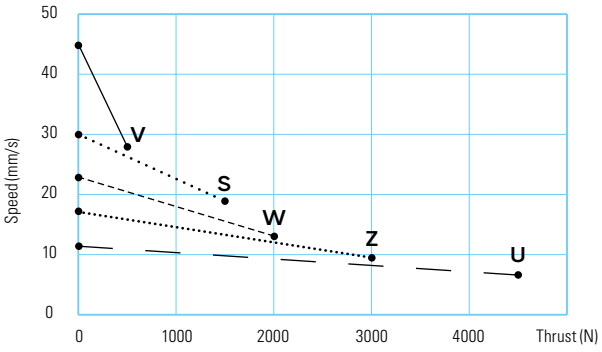
General Features

Maximum load	4,500N in push
Maximum dynamic bending moment	250Nm
Maximum static bending moment	500Nm
Maximum speed at full load	28mm/s (with 500N in a push condition)
Minimum installation dimension	Stroke + 147mm
Stroke	100~700mm
Operational temperature range	+5°C~+45°C
Options	Hall sensor(s), cable exit from top/bottom side, direct cut system

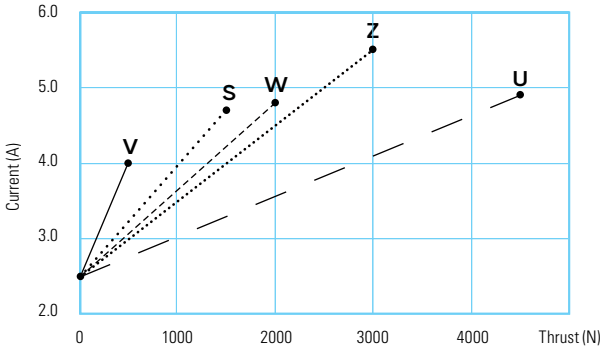
Performance Data

Motor Speed 24V DC 3800RPM

Speed vs. Thrust



Current vs. Thrust



NOTE

1 The performance data in the curve charts shows theoretical value.
